Profile

Hands-on Tech Lead across finance and media. I led the backend team at Eleven Sports reporting to the CTO, served as Scrum Master and squad specialist at SWIFT, and now coach 5+ squads on secure, automated delivery. I stay in the code: microservices migrations, event-driven platforms, CI/CD blueprints and database migrations at the billion-record scale.

17+

years in software engineering

40+

Java apps on zero-touch release orchestration

300+

VMs on orchestrated patching, 40% faster

100k+

concurrent users on a Kafka/Vert.x platform

Core skills

Ways of working	Scrum Master practice, Technical leadership & mentoring, DevSecOps coaching, Standards & enterprise-pattern adoption
AI-assisted engineering	Claude Code, OpenAI Codex, Devin, Governed agentic workflows, AI-assisted code review
DevSecOps & CI/CD	CloudBees CI (expert), CloudBees CD/RO (expert), Jenkins, CircleCI, SAST / DAST / SCA gates, SBOM & supply-chain security, Policy as code, Platform engineering (golden paths)
Governance & compliance	DORA (EU Digital Operational Resilience Act), Deployment governance
Backend	Java 8–21, Spring Boot / Security / Web, Vert.x, REST, GraphQL, JPA / Hibernate, JUnit 5
Architecture	Microservices, Event-driven / CQRS, Apache Kafka, Hazelcast clustering, API gateways (Kong, Ambassador)
Cloud & Data	AWS (EC2), Google Cloud Platform, Oracle, PostgreSQL, SQL tuning & partitioning

Experience

DevSecOps Architect (Customer Success Architect), SWIFT · Brussels, Belgium · Consultant Jan 2025 – Present
Returned to SWIFT in 2025 for the DevOps Engineering Services organisation: a regulated, multi-squad platform behind global secure financial messaging.

- Onboarded 40+ Java applications onto the centralised Release Orchestration platform (CloudBees CD/RO), zero-touch from commit to production; my team delivered 80%+ of the company KPI for 100% zero-touch.
- Designed the CI/CD blueprints (golden paths) every onboarded squad ships through; coached 5+ squads as DevSecOps solutions architect and technical reference for secure delivery, enterprise patterns and standards.
- Built 20+ orchestrated-patching pipelines covering 300+ VMs, cutting patching time by 40% and making patch cycles repeatable enough that teams trust them; core of the company KPI for 100% orchestrated VM patching.
- Integrated SAST/DAST scanning into the standard pipelines of several critical applications, turning security findings into enforced gates in the secure SDLC.
- Added SBOM generation and policy-as-code guardrails to the standard pipelines, giving supply-chain visibility and enforceable controls aligned with DORA's ICT-risk and resilience requirements.

Senior Software Engineer, Swissquote · Geneva, Switzerland (hybrid) · Consultant Jul 2024 – Dec 2024
Swiss online bank; regulated, high-availability financial environment.

- Led the migration of a 2.5 billion-record financial database to Oracle, preserving data integrity and business continuity throughout.
- Built a high-performance Java data loader that moved 2.5 billion records between databases without disrupting consumers.

- Spearheaded the migration of the Identity Management monolith to a microservices architecture, keeping the service live for users throughout the transition.
- Led the JSF-to-Angular migration of the same platform, a delivery tied directly to a key business KPI.
- Owned the container strategy for two squads as Docker champion, building and hardening the images and keeping them aligned with security and tooling standards.
- Served as Scrum Master alongside agile coaches and mentored junior developers as the squad's specialist, improving delivery flow and onboarding.

- Designed from scratch a cloud-native, clustered CQRS/event-driven microservices backend on Vert.x, built for high throughput and low latency.
- Architected a real-time fan-engagement platform on Kafka enabling live, social-network-style interaction between football players and their fans.
- Ran the platform on Kubernetes and GCP, supporting hundreds of thousands of concurrent interactions, with Prometheus/Grafana monitoring for availability.
- Led and mentored the backend team, reported progress directly to the CTO and helped other teams adopt Vert.x.

Open frameworks

Frameworks published under Techstream, my consultancy — github.com/sotille.
[DevSecOps Framework](#) — principles, architecture patterns, security controls and implementation guidelines

Earlier experience

Senior Java Developer, WPLEX · public transport · Brazil	2015 – 2018
Java Developer, Metaway · public sector · Brazil	2015
Java Developer, Città · public management · Brazil	2010 – 2014
Junior Java Developer, Allcance (formerly Holma Software) · industry · Brazil	2008 – 2009

Education & certifications

Universidade de Passo Fundo (UPF) · Brazil	
Postgraduate diplomas, Cloud Security & Smart Contracts and AI & Data Science	2023
B.Sc. Computer Science	2016
CNCF / Linux Foundation	
Certified Kubernetes Security Specialist (CKS) and Administrator (CKA) · in progress	2026

Languages

Portuguese	Native
English	Fluent
French	B1 · intermediate

What colleagues say

“A technical reference and mentor for multiple engineering teams, frequently sought out for guidance on secure software delivery and release orchestration.” – Sudhir Indurti, Lead DevOps Engineer, SWIFT, 2026	“Probably the most skilled developer I have ever met. Enthusiastic about new technologies and making things work.” – Arnau Rovira, DevOps Engineer, Eleven Sports
