

Three squads over five years: Identity Management, Community Gateway and Knowledge Channels.

- Spearheaded the migration of the Identity Management monolith to a microservices architecture, keeping the service live for users throughout the transition.
- Led the JSF-to-Angular migration of the same platform, a delivery tied directly to a key business KPI.
- Owned the container strategy for two squads as Docker champion, building and hardening the images and keeping them aligned with security and tooling standards.
- Served as Scrum Master alongside agile coaches and mentored junior developers as the squad's specialist, improving delivery flow and onboarding.
