■ PROFILE

Principal DevSecOps Architect and founder of Techstream. Designs secure delivery for regulated, high-availability platforms (SWIFT, Swissquote): release orchestration, golden-path pipelines, SBOM, policy-as-code and DORA-aligned controls, then coaches squads and leadership until the standard holds. Publishes open frameworks on release governance, supply-chain security and DevSecOps maturity; governs coding agents (Claude Code, Codex, Devin) with the same gates as human-written code.

17+

years in software engineering

40+

Java apps on zero-touch
release orchestration

300+

VMs on orchestrated patching,
40% faster

2.5bn

financial records migrated to
Oracle

■ CORE SKILLS

DevSecOps & CI/CD

CloudBees CI (expert) CloudBees CD/RO (expert) Jenkins CircleCI SAST / DAST / SCA gates
SBOM & supply-chain security Policy as code Platform engineering (golden paths)
Secure SDLC Ansible Automation Platform Docker Kubernetes

Governance & compliance

DORA (EU Digital Operational Resilience Act) Deployment governance

Ways of working

Scrum Master practice Technical leadership & mentoring DevSecOps coaching
Standards & enterprise-pattern adoption

AI-assisted engineering

Claude Code OpenAI Codex Devin Governed agentic workflows AI-assisted code review

Architecture

Microservices Event-driven / CQRS Apache Kafka Hazelcast clustering

Cloud & Data

AWS (EC2) Google Cloud Platform Oracle PostgreSQL

■ EXPERIENCE

DevSecOps Architect (Customer Success Architect) (Consultant) · **SWIFT**, Brussels, Belgium Jan 2025 – Present

Returned to SWIFT in 2025 for the DevOps Engineering Services organisation: a regulated, multi-squad platform behind global secure financial messaging.

- Onboarded **40+** Java applications onto the centralised Release Orchestration platform (CloudBees CD/RO) with zero-touch deployment from commit to production; my team delivered 80%+ of the company-level KPI to move 100% of applications to zero-touch.
- Designed the CI/CD blueprints (golden paths) every onboarded squad ships through and coached **5+** squads as DevSecOps solutions architect: enterprise patterns, delivery standards and the technical reference for secure delivery.
- Built **20+** orchestrated-patching pipelines covering 300+ VMs, cutting patching time by 40% and making patch cycles repeatable enough that teams trust them; core of the company KPI for 100% orchestrated VM patching.
- Integrated SAST/DAST scanning into the standard pipelines of several critical applications, turning security findings into enforced gates in the secure SDLC.
- Added SBOM generation and policy-as-code guardrails to the standard pipelines, giving supply-chain visibility and enforceable controls aligned with DORA's ICT-risk and resilience requirements.
- Set the governance discipline for coding-agent work, scoped tasks, human review and the same security gates as human-written code, and shipped agent-first with Claude Code, OpenAI Codex and Devin.

Senior Software Engineer (Consultant) · **Swissquote**, Geneva, Switzerland (hybrid)

Jul 2024 – Dec 2024

Swiss online bank; regulated, high-availability financial environment.

- Led the migration of a 2.5 billion-record financial database to Oracle, preserving data integrity and business continuity throughout.
- Produced migration reports and technical documentation that DBA and engineering squads used for decisions and risk mitigation.

Senior Software Engineer (Consultant) · **SWIFT**, Brussels, Belgium

Jul 2019 – Jun 2024

Three squads over five years: Identity Management, Community Gateway and Knowledge Channels.

- Spearheaded the migration of the Identity Management monolith to a microservices architecture, keeping the service live for users throughout the transition.
- Owned the container strategy for two squads as Docker champion, building and hardening the images and keeping them aligned with security and tooling standards.

Tech Lead & Senior Software Engineer · **Eleven Sports**, Lisbon, Portugal

Jun 2018 – Jun 2019

Sports media group (premium TV channels and OTT); first backend engineer on the player-experience platform, reporting to the CTO.

- Designed from scratch a cloud-native, clustered CQRS/event-driven microservices backend on Vert.x, built for high throughput and low latency.
- Ran the platform on Kubernetes and GCP, supporting **hundreds of thousands** of concurrent interactions, with Prometheus/Grafana monitoring for availability.
- Designed the CI/CD pipelines (CircleCI to GCP) the team shipped through.

■ OPEN FRAMEWORKS & WRITING

Frameworks published under Techstream, my consultancy — github.com/sotille · articles — medium.com/@fsotille.

DevSecOps Maturity Model — assess and guide organisations towards secure software delivery
Release Orchestration Framework — deployment governance and controlled delivery across environments
Software Supply Chain Security Framework — dependencies, build systems, artifacts and deployment environments
AI DevSecOps Framework — securing AI-assisted and agentic software delivery
Why Your AI Agent Is the Next SolarWinds: Supply Chain Security for the Agentic Era · May 2026
The Four Layers of Software Supply Chain Integrity · May 2026
The 4-Phase DevSecOps Transformation · Apr 2026

■ EARLIER EXPERIENCE

Senior Java Developer · WPLEX (public transport), Brazil	2015 – 2018
Java Developer · Metaway (public sector), Brazil	2015 – 2015
Java Developer · Città (public management), Brazil	2010 – 2014
Junior Java Developer · Allcance (industry), Brazil	2008 – 2009

■ EDUCATION & CERTIFICATIONS

Universidade de Passo Fundo (UPF), Brazil	
Postgraduate diplomas, Cloud Security & Smart Contracts and AI & Data Science	2023
B.Sc. Computer Science	2016
Certified Kubernetes Security Specialist (CKS) and Administrator (CKA) · CNCF / Linux Foundation (in progress)	2026

■ LANGUAGES

Portuguese · Native English · Fluent French · B1 · intermediate

■ WHAT COLLEAGUES SAY

“His ability to solve complex technical challenges and deliver scalable solutions in such a demanding environment reflects a deep understanding of modern software engineering practices.”

— Matteo Castellarin, Lead Dev/Systems Engineer, SWIFT DevOps Engineering Services, 2026

“A technical reference and mentor for multiple engineering teams, frequently sought out for guidance on secure software delivery and release orchestration.”

— Sudhir Indurti, Lead DevOps Engineer, SWIFT, 2026
