■ PROFILE

DevSecOps architect and coach for regulated, high-availability platforms (SWIFT, Swissquote). Designs the release-orchestration and security standards that squads ship through, then coaches 5+ squads until the standard holds: golden-path pipelines, SBOM, policy-as-code and DORA-aligned controls. Agent-first with Claude Code, Codex and Devin; a Java/Linux background means I speak the developers' language.

17+

years in software engineering

40+

Java apps on zero-touch
release orchestration

80%+

of the zero-touch deployment
KPI, by my team

-40%

patching time, 300+ VMs, 20+
pipelines

■ CORE SKILLS

DevSecOps & CI/CD

CloudBees CI (expert) CloudBees CD/RO (expert) Jenkins SAST / DAST / SCA gates
SBOM & supply-chain security Policy as code Platform engineering (golden paths)
Secure SDLC Ansible Automation Platform Docker Kubernetes Linux HashiCorp Vault

AI-assisted engineering

Claude Code OpenAI Codex Devin Governed agentic workflows AI-assisted code review

Governance & compliance

DORA (EU Digital Operational Resilience Act) Deployment governance

Ways of working

Technical leadership & mentoring DevSecOps coaching Standards & enterprise-pattern adoption

Cloud & Data

AWS (EC2) Google Cloud Platform Oracle PostgreSQL SQL tuning & partitioning

Backend

Java 8-17 Spring Boot / Security / Web Vert.x REST GraphQL

Architecture

Microservices Event-driven / CQRS Apache Kafka Hazelcast clustering

■ EXPERIENCE

DevSecOps Customer Success Architect (Consultant) · **SWIFT**, Brussels, Belgium

Jan 2025 – Present

Global cooperative behind secure financial messaging; DevOps Engineering Services organisation serving a regulated, multi-squad platform.

- Onboarded **40+** Java applications onto the centralised Release Orchestration platform (CloudBees CD/RO) with **zero-touch** deployment from commit to production; my team delivered **80%+** of the company-level KPI to move **100%** of applications to **zero-touch**.
- Designed the CI/CD blueprints (golden paths) every onboarded squad now ships through and coaches **5+** squads as DevSecOps solutions architect: enterprise patterns, delivery standards and the technical reference for secure delivery.
- Built **20+** orchestrated-patching pipelines covering **300+** VMs, cutting patching time by **40%** and making patch cycles repeatable enough that teams trust them; core of the company KPI for **100%** orchestrated VM patching.
- Integrated SAST/DAST scanning into the standard pipelines of several critical applications, turning security findings into enforced gates in the secure SDLC.
- Drives SBOM generation and policy-as-code guardrails in the standard pipelines, giving supply-chain visibility and enforceable controls aligned with DORA's ICT-risk and resilience requirements.
- Works agent-first with coding agents (Claude Code, OpenAI Codex, Devin) under a governance discipline: scoped tasks, human review and the same security gates as human-written code.

Senior Software Engineer (Consultant) · **Swissquote**, Geneva, Switzerland (hybrid)

Jul 2024 – Dec 2024

Swiss online bank; regulated, high-availability financial environment.

- Led the migration of a **2.5 billion**-record financial database to Oracle, preserving data integrity and business continuity throughout.

- Spearheaded the migration of the Identity Management monolith to a microservices architecture, keeping the service live for users throughout the transition.
- Owned the container strategy for two squads as Docker champion, building and hardening the images and keeping them aligned with security and tooling standards.

- Designed from scratch a cloud-native, clustered CQRS/event-driven microservices backend on Vert.x, built for high throughput and low latency.
- Ran the platform on Kubernetes and GCP, supporting **hundreds of thousands** of concurrent interactions, with Prometheus/Grafana monitoring for availability.
- Designed the CI/CD pipelines (CircleCI to GCP) the team shipped through.

■ OPEN FRAMEWORKS & WRITING

Frameworks published under Techstream, my consultancy — github.com/sotille · articles — medium.com/@fsotille.

Release Orchestration Framework — deployment governance and controlled delivery across environments
Software Supply Chain Security Framework — dependencies, build systems, artifacts and deployment environments
AI DevSecOps Framework — securing AI-assisted and agentic software delivery
Why Your AI Agent Is the Next SolarWinds: Supply Chain Security for the Agentic Era · May 2026
The Four Layers of Software Supply Chain Integrity · May 2026
The 4-Phase DevSecOps Transformation · Apr 2026

■ EARLIER EXPERIENCE

Senior Java Developer · WPLEX (public transport), Brazil	2015 – 2018
Java Developer · Metaway (public sector), Brazil	2015 – 2015
Java Developer · Città (public management), Brazil	2010 – 2014
Junior Java Developer · Allcance (industry), Brazil	2008 – 2009

■ EDUCATION & CERTIFICATIONS

Universidade de Passo Fundo (UPF), Brazil	
Postgraduate, Cloud Security & Smart Contracts	2023
Postgraduate, AI & Data Science	2023
B.Sc. Computer Science	2016
Certified Kubernetes Security Specialist (CKS) · CNCF / Linux Foundation (in progress)	2026
Certified Kubernetes Administrator (CKA) · CNCF / Linux Foundation (in progress)	2026

■ LANGUAGES

Portuguese · Native English · Fluent French · B1 · intermediate

■ WHAT COLLEAGUES SAY

“His ability to solve complex technical challenges and deliver scalable solutions in such a demanding environment reflects a deep understanding of modern software engineering practices.” — Matteo Castellarin, Lead Dev/Systems Engineer, SWIFT DevOps Engineering Services, 2026	“He does not merely automate tasks; he engineers repeatable, resilient delivery systems that improve deployment reliability, enforce secure coding standards and reduce operational risk.” — Anastasios Lagos, DevSecOps Engineer, Mindwave (SWIFT programme), 2026
